

The Mec Shark

By Gabo

The superheroes were on vacation at Beech Haven. They just jumped in the water when a shark came swimming by. They swam as quick s they could. Then, they told each other that they needed to fight that shark. So, they put out their water daggers and swords. They jumped back in the water and they fought the shark. They hit it on the head and they said, “this looks like it’s made of metal!”. Henry said “Guys, this isn’t a real shark! It is a robot shark!” so they destroyed it, and they opened up the lid.

The princess that was a mummy, that was controlling the shark, was a different secret princess of Japan.

The End
